

# Shubham Vilas Vyawahare

## MERN Stack Developer

### Skills Set

Languages	C C++ Java
UI Languages	HTML 5 CSS 3 ReactJs
Frameworks	Bootstrap,Materialize,Pure Css semantic UI,Tailwind CSS,ExpressJs
CMS	WordPress Drupal
SEO	Speed Optimization, Web page Ranking Google console,Page rendering
Database	Mysql,Mongo
Script	NodeJS,PHP,Javascript,Python AngularJs,Jquery

### Personal Information

Name	Shubham Vilas Vyawahare
DOB	06-Nov-1994
Email	<a href="mailto:Shubhamvv611@Gmail.com">Shubhamvv611@Gmail.com</a>
Phone	<a href="tel:9665558778">9665558778</a>
Address	At.Post Shewala tq.Kalamanuri Dist.Hingoli
Gender	Male
Language	English,Hindi,Marathi

### Achievement

- Young Entrepreneur Award 2017 by Scientist Raghunath Mashelkar At Pune.
- Participate in a Persistence Semicolon 2017 24-hour coding competition .
- PHP Dungal Competition Runner Up
- Second Price Winner In the Drama Competition conducted by Vishwshanti Gyanpeeth School Rahati,Parbhani

### Educational Details

- Bachloer of Engineering Inforamation Technology International Institute Of Inforamation Technology Pune (IIIT Pune)
- HSC (Science With Computer) Chandrbhanu Sonwane Junior College Latur
- SSC Vishwashanti Gyanpeeth Parbhani

### Important Work

#### [www.Dompsc.com](https://www.Dompsc.com)

- DoMpsc is an excellent online platform specifically designed for aspiring MPSC (Maharashtra Public Service Commission) candidates in the state of Maharashtra.
- This user-friendly website caters to the needs of paperless studying by providing a wide range of study materials and resources. With a staggering traffic of 3 million users within a span of six months

#### Vikara Systems

- As the CEO of a company, I led a startup team of four members in our efforts to revolutionize paper-based processes through the development and implementation of ERP software. Our focus was on designing and creating an ERP system specifically tailored for engineering colleges.
- Our efforts were recognized when I was honored as the Young Entrepreneur of the Year by Scientist Raghunath Mashelkar, alongside Vijay Bhatkar, at the International Institute of Information Technology Pune.
- We designed a beta version of the ERP system in collaboration with a college, and subsequently developed and implemented it with dynamic database operations

#### <https://isquareit.ac.in>

- I have successfully designed and developed the official website for the International Institute of Information Technology Pune.
- incorporating the latest UI technologies and frameworks.

#### Cloud Based Online Voting System For Panchayat Raj Elections

- The rise in the percentage of migration is having an impact on the quality of voting in rural areas, as educated individuals are relocating to metropolitan cities. In order to address this issue and enhance the quality of voting in Corporations and all government institutions at the city, block, and village levels, the Government of India is currently developing a Remote Voting System (RVS) set to be implemented in 2023.
- As a freelancer, I have designed this AWS SAAS-based project specifically for college students.
- I had also applied for a patent registration; however, I regret to inform you that it was not successful.

#### QuickKart-Self Checkout System At Shopping Stores

- I endeavored to address the issue of billing complications during the checkout process with the intention of resolving the D Mart checkout management problem.
- Develop a comprehensive and dynamic Android application with integrated PayTm payment gateway.

#### Examination System For IIIT Pune Engineering College

- I Design and develop Whole Examination System for the Newly allocated College student to examine their General talent performance with define exams and sort them into different batches.
- The Student and Admin Portal offers a wide range of functionalities, including user authentication, account creation with OTP validation, and monitoring exam-related activities on the student portal. Additionally, the admin portal allows for various operations such as creating exams, adding questions, displaying and printing results, as well as sorting students based on their exam performance. These portals also ensure secure login and implement necessary security measures.

Similarly developed Many More Projects in The described Technologies As per Requirement and Events.

### Kasturi Agency CRM Systems

- I designed and developed a customer interaction system for The Kasturi agency in Nanded
- The system allows users to sort products according to their requirements and place orders based on their interests,
- The order activity can be viewed at the admin portal by the agency. This system efficiently manages all the activities of sellers and users in a dynamic manner

### Cluster Based City Criminals Information System

- I designed and implemented a Cluster-based Criminal Information System to provide citizens with access to a comprehensive criminals database for their city and area. This system aids in understanding the criminal history of politicians
- The implementation of this system will contribute to periodically enhancing the transparency of politics.
- This system is undoubtedly poised to enhance transparency among citizens.
- Mongo Database is commonly utilized in various domains for data storage and management purposes.

### CityMart For Grocery Shopping

- I have previously designed and developed a city-based online grocery web application prior to the widespread recognition of Bigbasket
- This platform allows users to efficiently carry out various operations such as sorting, purchasing, and saving items for future purchases. Additionally, it enables users to create monthly lists and compile item-specific lists for their shopping needs.

- Spearheaded the development and successful delivery of high-quality web applications, leveraging full-stack expertise in HTML, CSS, JavaScript, PHP, MySQL, and MongoDB. Achieved a significant increase in team efficiency and productivity by implementing Bootstrap and Git, resulting in streamlined development processes and

## Work Experiences

Worked as a Intern in Data Science  
Technology Pune

May 2016

- Collecting data from different sources, processing it, and storing it in a ready-to-use format in the company's data warehouse are some of the most common activities of data engineers.
- Similarly Handled Data Binding at Front End Using Angular JS And Scripting Technologies.
- Working in the field of data science explored many domains to learn and develop Data engineering Key skills with MYSQL databases.

Worked as a Intern I2IT College  
Hinjewadi as a Developer

May 2016-Dec 2017

- I was given a valuable opportunity during my time in college to design and develop an official website portal for the institution.
- In this project, I was responsible for designing the entire website from scratch, determining how data would flow, establishing connections between pages, and ensuring a seamless user experience across all devices
- Additionally, I successfully addressed all issues related to mobile responsiveness by utilizing advanced Bootstrap technologies
- As a full stack developer, I also took care of the backend aspects of the website, which allowed me to enhance my skills in database management using MySQL and MongoDB, as well as gain practical experience in PHP technologies.
- In order to create a user-friendly interface, I incorporated the latest jQuery framework for dynamic activities.
- Furthermore, I utilized the Bootstrap framework to optimize the loading speed of the website and ensure its mobile responsiveness.

Worked as a Junior Developer at  
Cloudredux Technology Hinjewadi

2017

- I served as a Junior Fullstack Developer, responsible for developing applications for clients based in the United States.
- These applications were focused on training and management. One such project involved the development of a CRM system for clients offering online training courses.
- In this role, I was tasked with developing the necessary system using a range of front-end technologies, including HTML5, CSS3, PHP, Bootstrap 3, and various scripting languages as required
- Additionally, I gained a thorough understanding of the data flow within the MySQL database, enabling me to display dynamic results within the user login system.

Worked as a Developer at  
Hummingbird Technology Pune

2018

- This company offers a range of products for ecommerce businesses, including HumCommerce.com, DealFuel.com, PhotoWhoa.com, cyberChimps.com, Inkydeals.com, and more. As a developer, I am responsible for working with these products based on specific requirements.
- Through my experience, I have gained knowledge on how ecommerce websites can overcome their persistent issues with the assistance of the mentioned products.
- My role as a developer involves working with both frontend and backend technologies. I have successfully managed dynamic data flow using MySQL for various products. These products are primarily associated with UI technologies, backend scripting, data binding,
